EDUCATION

Mumbai University

Master of Computer Applications (MCA)

Aug 2025 - Present

Mumbai, Maharashtra

- Relevant Coursework: Data Structures & Algorithms, Advanced Database Management Systems, Mobile Application Development, Software Engineering.

Mumbai University

Bachelor of Science in Information Technology (B.Sc. IT)

Aug 2022 - Apr 2025

Mumbai, Maharashtra

EXPERIENCE

Python Engineer Intern

ONLEI Technologies

June 2024 - May 2025

Mumbai, India

- Engineered 3 scalable REST API endpoints using Flask, reducing integration latency by 20% and supporting high-concurrency data requests for internal web applications.
- Optimized deployment cycles by standardizing modular component architecture, improving code reusability across 5+ internal projects and reducing manual debugging time by 10%.
- Collaborated with senior engineers to implement automated unit testing, increasing test coverage by 30% and reducing production bug reports by 15%.

PROJECTS

NexOps AI - Multi-Tenant Client Project Management SaaS | React, TypeScript, Node.js, Express, MongoDB, Socket.IO, Docker

- Built a multi-tenant SaaS platform for agencies with isolated client, project, Kanban task, ticket, document, invoice, and notification workflows.
- Implemented JWT authentication, refresh-token handling, centralized role-based permissions, tenant-scoped data access, Zod validation, and audit logging.
- Delivered a responsive dashboard and persistent Kanban board with real-time project chat, presence, typing indicators, task and ticket updates, and notifications via Socket.IO.

TradeX - iOS Stock Portfolio Management App | Swift, SwiftUI, SwiftData, MVVM, Yahoo Finance API, Groq LLM API, Apple Charts

- Built a high-performance data pipeline using SwiftData and async/await, enabling real-time processing of 2,000+ stocks with 40% faster search response times compared to standard implementations.
- Engineered a responsive portfolio dashboard using Apple Charts, maintaining sub-100ms UI latency under high data loads and reducing user time-to-insight by 30% through automated LLM-driven analysis.

Dime - iOS Personal Finance App | Swift, SwiftUI, App Intents, WidgetKit, iCloud (CloudKit), Local Authentication

- Architected a comprehensive personal finance platform using SwiftUI and iCloud, ensuring 99.9% data consistency across user devices.
- Optimized user workflows by integrating App Intents and WidgetKit, reducing expense-logging time by 40% through streamlined home-screen interactions.
- Automated recurring transaction management and implemented Face ID security, reducing manual entry effort by 50% while maintaining high-grade data privacy.

EquityLens - Stock Analysis & Portfolio Management Web App | Python, Streamlit, TensorFlow (LSTM), Supabase, Plotly

- Built a full-stack platform tracking all Nifty 50 stocks with technical indicators, candlestick charts, sector heatmaps, and a 30-day LSTM price-prediction model; backend and database hosted on Supabase.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, Swift, C++, SQL

Frontend: React, Vite, Tailwind CSS, React Router, TanStack Query, Zustand, React Hook Form, Recharts, Axios

Backend & Data: Node.js, Express.js, MongoDB, Mongoose, Socket.IO, Redis, REST APIs, JWT, bcrypt, Nodemailer

Testing & DevOps: Zod, Vitest, React Testing Library, Playwright, Docker, GitHub Actions, Swagger/OpenAPI, Git, GitHub

Additional: SwiftUI, SwiftData, MVVM, Flask, PostgreSQL (Supabase), TensorFlow, Streamlit, Plotly, Agile
